A section of Rhododendron Field in our nursery at Georgetown, over 100,000 blossoms

Putting up orders at our city sales yard near the store

Announcement

AST spring we purchased the stock and equipment of the Sandved Nursery, which adds materially to our complete assortment of ornamental stock. Our new twenty acre tract at Georgetown, a mile nearer the center of the city than our old nursery and readily accessible by motor and city street car, is now being developed into one of the finest nursery establishments in the country.

MALMO & COMPANY

HORTICULTURAL SERVICE

For the beautification of your home grounds you are invited to consult our experienced staff of nurserymen who are at your service to give information regarding desirable plants, trees and shrubs, together with cost estimates.

If you are contemplating planting an orchard or only a few trees for your own use, we offer you the advantage of our experience of thirty years in this section, concerning best varieties and care of stock.

OUR SEED DEPARTMENT

The constant policy of our seed department to furnish only reliable select seeds that have been tested to grow has favored us with an increased patronage that necessitated our removal a year ago to our present store which affords three times the space and facilities of the former location. The following extract is typical of unsolicited comment:

November 20, 1922.

Malmo & Company, Seattle, Wash.

Dear Sirs: Dear Sirs:

"* * inclosing another order. I must send to you for my seeds as they are so reliable. Last year I believe I raised the finest sweet peas that ever grew in the ground. Everyone wanted to know where I bought my seed. I have sent everywhere for seeds and bulbs, but have decided from now on to do my shopping in that line with you. * * *" Yours truly, A. L.

(Original letter on file.)

NURSERY STOCK—SEED

PLANTING GUIDE OF USEFUL INFORMATION FOR REFERENCE

The aim of this book is to serve as a reliable guide for the planting and care of the home garden, orchard or farm. It includes knowledge in these lines gained through thirty years experience. not only on the Coast, but also on the east side of the Cascade mountains.

Our long experience in the Nurserv business in Seattle, which has given us an intimate knowledge of varieties best adapted to our soil and climate. conclusively proves that home-grown, acclimated nursery stock gives the best results, and that the planting of trees and shrubs that have been out of the ground a long time with improper care, almost invariably fails to give satisfaction. Plants which have been mistreated or stunted in their growth can never fully recover, and in most cases are really of little or no value.

We have, at great expense, provided facilities for the protection of our home grown stock. You will find our trees, evergreens and shrubs growing in well prepared soil in our nursery at Georgetown, or at our large sales yard, a block from our store, where you can select stock that has been properly transplanted and cared for.

We grow all kinds of nursery stock extensively at our Georgetown Nursery, and invite our customers to inspect the same. When in full bloom, our field of several thousand Rhodendrons presents a massive floral display of over 100,000 blossoms, in fifteen different shades and colors. There are tens of thousands of roses in new and leading varieties, a wonderful collection of flowering shrubs, evergreens, fruit trees, and small fruits. You will be pleased to observe the possibilities of the Puget Sound country, rivalling Holland in the growing of nursery stock and bulbs.

It is our chief aim to carry stock of the highest quality strictly true to name. Our stock is, we believe, the largest and most complete on the Pacific Coast, enabling us to care for orders of any quantity, however large or small.

MAIL ORDERS

For those who are unable to call at our sales yard or nursery to make personal selection of the stock desired, we offer the service of our mail order department. Its staff of experienced nurservmen and seedsmen, will make the selection for you with the same care as if acting under your immediate personal supervision. We realize that the satisfied customer is the essential factor in the business growth that has made us the largest nursery mail order establishment in the Northwest.

HOW TO ORDER-Kindly fill out order sheet carefully, sending in same as soon as convenient after receiving this catalog. Nursery Stock, Seeds and Bulbs should have the desired quantity written distinctly in the column provided for that purpose, with price after each item.

Packing and Shipment-We are especially equipped for packing Nursery Stock and Seeds for long distance shipping. We have had thirty years experience in handling goods of this class

and pack to insure arrival at destination in good condition regardless of distance.

Freight-On Nursery Stock orders of \$10.00 or more we prepay freight charges to any point within 50 miles of Seattle. On orders for less than \$10.00 add enough to cover transportation.

TERMS—Cash with order. Send remittances by Money Order, Draft or Registered Letter.

We exercise the greatest care to furnish seeds, bulbs, plants, shrubs and trees that are pure and reliable, but owing to the various conditions of climate, soil and cultivation attending success, we do not warrant in any way, express or implied, the description, purity, productiveness or any other matter of any seeds, bulbs, plants, shrubs or trees sold by us, and we will not be in any way responsible for the crop. If the purchaser does not accept these goods on above terms, no sale is made thereof and the goods must be returned to us at once and the money will be refunded.

References-Seattle National Bank or any bank or wholesale house in Seattle.

PARCEL POST RATES

Parcels weighing eight ounces or less, containing books, seeds, cuttings, bulbs, roots, scions and plants, 1 cent for each two ounces or fraction thereof, regardless of distance.

Other parcels of fourth class matter are chargeable according to distance zone at pound rates.

Local Zone. Shipments handled by one postoffice only, 5c for first pound and 1 cent for each additional two pounds. Limit, 70 lbs.

First and Second Zones. To any postoffice

within 150 miles. 5c for the first pound and 1 cent for each additional pound. Limit, 70 lbs.

Third Zone. More than 150 miles, less than 300 miles. 6 cents for the first pound and 2 cents for each additional pound. Limit, 70 lbs.

(Fourth to Eighth Zone, limit 50 lbs.)

The limit of size of a package that will be accepted by parcel post is 84 inches in length and girth combined. Larger packages must be forwarded by express or freight.

Our Prices Are the Lowest Consistent with Quality

SELECTED NURSERY STOCK

WHEN AND HOW TO PLANT

Special attention is called to the superior quality of Nursery stock which we supply. Our experience in growing and transplanting Nursery stock in the Puget Sound climate covers nearly thirty years. This climate is particularly well adapted to a wide range of varieties of Nursery stock that heretofore have been successfully grown only in certain parts of Europe. The varieties range from the hardiest to semi-tropical plants. Evergreens thrive especially well in our climate, obtaining better growth and color than in any other part of the world.

Evergreens may be successfully transplanted the year round providing sufficient water is used, but the best time to transplant is early in the fall or late in the spring. Ornamental deciduous trees and shrubs and all kinds of fruit trees and berry bushes may be set out any time after the rainy season commences (generally some time in November) until the first of April. The early

planting, however, is much preferable as it gives the trees and plants a chance to establish a new root system before the dry season commences. Plants or trees of any size may be transplanted successfully providing they have been properly cared for in the Nursery. Our stock is transplanted every two or three years, thereby producing a root system on the Evergreens that will hold firmly to a ball of soil, and a mass of fibre roots on the deciduous trees, insuring full success in transplanting.

We make a specialty of large size fruit trees in varieties best adapted to this climate. These are transplanted every year in our nursery to insure a perfect root system and can be set out by the planter as safely as smaller trees. Many of these trees are highly ornamental, producing fruit as well as beautifying the home. Our stock is large and complete. We invite requests for

estimates on planting of orchards.

GUIDE FOR THE PLANTING AND CARE OF FRUIT TREES

ORCHARD AND GARDEN

The State of Washington ranks among the first in fruit production. With proper care given to varieties suitable for Western Washington, fruit may be as profitably grown in the Puget Sound section as in the celebrated fruit districts of Eastern Washington.

The Puget Sound climate is adapted to the growing of both sweet and sour cherries, pears and many varieties of apples, including Yellow Transparent and Gravenstein. Western Washington is unexcelled in its production of prunes and plums.

Where one has not sufficient space for an orchard, a few fruit trees in the garden or back yard may be made to yield a high return for the space occupied. Such planting need not exclude the vegetable garden, which may be planted be-

tween the trees, and the soil made, with the addition of proper fertilizers, to accomplish double duty production.

The first requisite for the successful growing of trees is proper preparation of the soil. The ground should be plowed very deeply and thoroughly as the roots will soon gather food from the whole orchard area.

PLANTING

Trees should be heeled in only in a cool shady place. If the trees have, for any reason, before planting, become dried out, they should be buried, tops and all, in a trench which should be filled with water every day for three of four days, or at least soaked in water for a few hours, until the bark is restored to a healthy, plump condition.

GUIDE FOR THE PLANTING AND CARE OF FRUIT TREES-Continued

The holes should be staked out and dug before exposing the trees. The roots must be protected carefully from the sun and drying winds, as either will very soon wither up the fibrous roots which are necessary for quick and vigorous growth. The holes should be dug from six to twelve inches larger around than the roots of the trees, to allow for filling in a few inches of loose soil, on top of which the tree should be planted to the depth it formerly stood in the nursery row.

PRUNING

The first object is to establish a balance between the top and the roots, cutting off all bruised and broken branches. The second is to shape the top so as to make a good foundation for a well-shaped tree. Of course, this cannot all be done at one time. It is necessary each year to look after the shape of the tops, selecting such branches as are most desirable for the building of the tree; then cutting off the surplus. This applies especially to fruit trees. For apple trees, it is a general rule to cut back each year one-half of the previous season's growth. Shade trees and other ornamental stock, including shrubs and evergreens, are pruned only for desired shape.

The best time for pruning fruit trees, in the Puget Sound country, is the month of January, and not later than the end of February. On the east side of the Cascades, it may be done one month later. All winter pruning and spraying should be done at the time the trees are dormant.

SPRAYING

The spraying of fruit trees has proven to be an absolute necessity. Lime and sulphur is effective as a dormant spray to eliminate all pests. Generally the first summer spraying of fruit trees is applied by the time the blossoms are dropping, being followed by a second and third spraying, according to the pest to be eliminated.

SUITABLE DISTANCE FOR PLANTING

Apples, Pears Cherries, sweet and sour Plums	20 to 2	
Currants, Gooseberries, Raspberries	3 to

Loganberries, rows	8 by	8 feet
Strawberries, rows	1 by	3½ feet
Strawberries, in beds1	½ by	1½ feet

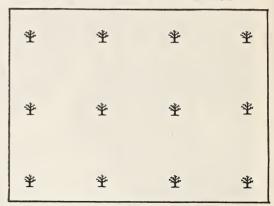

Fig. 1

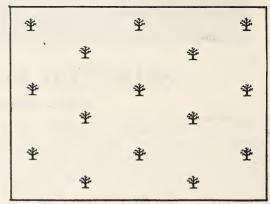

Fig. 2

METHODS OF PLANTING

There are two methods of planting, commonly followed throughout the Fruit Belt, namely, the "Square" method, and the "Hexagonal" or "Triangular" method. Each has its respective merits, and the illustrations given above will explain themselves. Figure 1 sets for the "Square" method, and Figure 2 the "Hexagonal." In each figure the trees are thirty feet apart each way. In the "Square" method of planting, the rows are thirty feet apart in each direction, while in the "Triangular" method, the rows in one direction are only twenty-seven and one-half feet apart, thus allowing a few more trees to be planted to the acre.

APPLES

PRICES

One year or light two year old.

4 to 6 feet:

Each. \$0.85: 10 for \$7.50: 100 for \$60.00. Lighter grade:

Each, \$0.60; 10 for \$5.00; 100 for \$45.00.

Large size two year old. Each, \$1.00; 10 for \$9.00; 100 for \$75.00.

Selected heavy two and three year old.

Each, \$1.25; 10 for \$11.00; 100 for \$100.00.

Big three year old, specimen trees. Each, \$1.50 to \$2.00.

SUMMER

Early Harvest. Yellow, medium size. Red Astrachan. Deep crimson; large.

Red June. Extra early. Red.

Yellow Transparent. Yellow; very early; best quality.

FALL

Duchess of Oldenburg. Red and vellow streaked. Fameuse (Snow). Deep crimson streaked. Flesh snowy white.

Gravenstein. Bright red and yellow. One of the best for this climate.

Red Gravenstein. (New.) Bright red. Same good quality as Gravenstein, a little later and better keeper.

Waxen. Rich yellow. Crisp, tender and juicy.

Wealthy. Yellow shaded with deep red.

Yellow Bellflower. Rich yellow, highly flavored.

WINTER

Arkansas Black. Rich flavor. Very good keeper. Strong, healthy grower.

Baldwin. Red. A leading variety in the east. Delicious. Thrifty grower. Quality and flavor unsurpassed. Very sweet.

Grimes Golden. Golden yellow. High quality. Jonathan. Red. Fine for table or market.

King David. Yellow. Bright red cheeks; subacid; good keeper.

King of Tomkins Co. Yellowish shaded with red. Mammoth Black Twig. Red. Large. Late keeper. McIntosh Red.

Northern Spy. Greenish, brown ribbed. keeper. Fine quality.

Oregon Red Winter.

R. I. Greening. Greenish yellow. Rich and tender. Rome Beauty. Yellow with red. Aromatic taste.

Spitzenburg Esopus. Splashed red. Stayman Winesap. Improved Winesap.

Wagener. Deep red. Flesh firm, sub-acid. Early and continuous bearer.

Winesap. Dark red. Medium size, excellent. Late keeper.

Winter Banana. Golden yellow, shaded red. Large, excellent flavor.

Yellow Newtown Pippin. Fine flavor. One of best keepers.

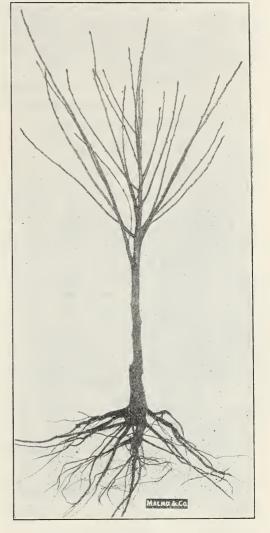

CRAB APPLES

Prices Same as Apples

Florence. Large red. Hyslop. Dark crimson.

Red Siberian. Red cheek on yellow ground. Transcendent. Red cheek.

Yellow Siberian. Small, golden yellow.

One Year Old Montmorency Cherry

CHERRIES PRICES.

One year or light two year old.

6 to 8 feet, extra heavy (sweet cherries only). Each, \$1.50; 10 for \$14.00; 100 for \$125.00.

Elberta. Large, yellow, red streaks. Rich and

Hale's Early. White flesh. Red cheek.

Late Crawford. Late; large; yellow. Philips Cling. Large, yellow. High flavored. Salway. Large. Deep yellow flesh. Late.

Slappy. Freestone, medium early, yellow, very hardy and a good keeper.

APRICOTS PRICES.

Selected heavy one and two year old, \$1.00. Two and three year old, \$1.50 to \$2.50.

Blenheim. Large, deep yellow.

Moorpark. Orange. Flesh bright orange. Large. Royal. Large yellow with orange cheek.

FIGS

Brown Turkey. Early, very hardy. Will ripen on Puget Sound.

Strong two and three year old, \$1.50.

NECTARINES

Boston. The best variety. Each, \$1.50. New White. Juicy and of high quality. \$1.50.

QUINCE

Strong two and three year old, \$1.50 to \$2.00. Champion. Large; of excellent flavor. Prolific. Orange. Large; golden color.

MULBERRY

Selected one and two year old, \$1.50. Downing's Everbearing. Very large, black. Russian. Small fruit. Tree hardy and prolific.

NUT TREES

Ask for prices on quantity.

ALMONDS

One year old, \$1.00. Selected two and three year old, each \$1.50 to \$2.00. I. X. L. Large, single kernel; soft shell. Nonpareil. Large, full kernel; thin shell.

CHESTNUTS

Selected heavy two and three year, 3-4 feet, \$1.50 to \$2.50. American Sweet. Valuable for timber and nuts. Japanese Chestnut. Dwarf grower; bears early. Spanish or Italian. Large nuts, produced abundantly.

FILBERTS—(Hazelnut)

Two and three year old, 3 to 4 feet, each \$1.00; 10 for \$8.50; 100 for \$75.00.

Four and five year old, 4 to 6 feet, each \$1.50; 10 for \$12.50; 100 for \$100.00.

English. Full flesh, sweet.

Barcelona. Very large, first quality. Du Chilly. Full fleshed, largest grown.

WALNUTS

English Walnut (Franquette). We offer a splendid strain of Franquettes, the best variety for this section; hardy, abundant bearers. Sturdy, thrifty trees with big fibrous roots: 2-3 ft., \$1.00; 3-4 ft., \$1.50; 4-6 ft., \$2.50; 8-10 ft., \$5.00.

English Walnut. Grafted, 4 to 6 ft., \$2.50 to \$3.50. Japan Walnut. 2 to 3 ft., \$1.00 to \$1.50.

Butternut or White Walnut. Large, long nut; bears earlier than English. (Same price as Franquette.)

SMALL FRUITS

Ask for prices on quantity

BLACKBERRIES

Cory Thornless Blackberry (New). This is the Blackberry long looked for. Identical with the Himalaya Giant except entirely thornless, making it easier to cultivate and possible to pick three times as many in a day. Fruit is large, small core, almost seedless, jet black and finest flavored. The culture and trellising is the same as for the Himalaya. Four of the strongest vines should be trained on wires, pruned annually and no suckers allowed to grow at base of plant.

Big plants, 50c; doz., \$5.00; 100 for \$25.00.

Large, well rooted tips, 25c each; doz., \$2.50 100 for \$15.00.

Evergreen. Each, 15c; doz., \$1.50; per 100, \$8.00. Himalaya Giant or Everbearing. Each, 20c; doz., \$2.00: \$12.00 per 100. \$100 per 1000.

\$2.00; \$12.00 per 100; \$100 per 1000. Extra large plants, each, 35c to 50c.

Kittatinny. Each, 20c; doz., \$2.00; \$12.00 per 100. Lawton. Each, 20c; doz., \$2.00; \$12.00 per 100. New Mammoth. Each, 25c; doz., \$2.00; \$15.00 per 100.

RASPBERRIES

Cumberland. Red. Each, 15c; doz., \$1.50; \$10.00 per 100.

Cuthbert. Red. Doz., 75c; \$3.50 per 100; \$15.00 per 1000.

Gregg. Blackcap. Each, 20c; doz., \$2.00.

Plum Farmer. Blackcap. Each, 20c; doz., \$2.00; \$12.00 per 100.

St. Regis. Everbearing. Each, 15c; doz., \$1.50; \$10.00 per 100.

LOGANBERRIES

Strong Rooted Tips. Ready for planting in March and April. Each, 10c; doz., \$1.00; \$5.00 per 100; \$45.00 per 1000.

Year Old Plants. Each, 15c; doz., \$1.50; \$10.00 per 100.

Large Two Year Old Plants. Each, 25c; doz., \$2.50; \$15.00 per 100.

PHENOMENAL BERRIES

Strong Rooted Tips. Each, 20c; doz., \$2.00; \$15.00 per 100.

Year Old Plants. Each, 35c; doz., \$3.50. Large Two Year Old Plants. Each, 50c; \$5.00 per

CURRANTS

One year old; each, 15c; doz., \$1.50; \$10.00 per 100.

Small plants; doz., \$1.00; \$5.00 per 100; \$35.00 per 1000.

Large one year, or two year old; each, 25c; doz., \$2.50; \$15.00 per 100.

Large two and three year old; each, 35c; doz., \$3.50; \$25.00 per 100.

Extra large selected plants. Each, 50c.

Cherry. Red. Pomona. Large red.

Fay's Prolific. Red. Red. Cross. Red.
Perfection. Red. White Grape. White.

GOOSEBERRIES

Oregon Champion. Strong, well rooted plants. Each, 15c; doz., \$1.50; \$9.00 per 100.

Large one, or light two-year-old. Each, 25c; doz., \$2.50.

Extra large plants. Each, 50c; doz., \$5.00. Pearl. Yellowish green. Each, 50c; doz., \$5.00. Poorman. Large yellow. Each, 50c; doz., \$5.00. Red Jacket (Jossilyn). Large prolifie. Each, 35c; doz., \$3.50.

Extra large plants. Each, 50c; doz., \$5.00.

STRAWBERRIES

Trebla. A grand, new berry with the wild strawberry flavor. Fruit very large, extra firm, dark red, produced on strong stiff straws carried well off the ground. Fast becoming the leading variety for market and canning. Doz., 50c; \$2.50 per 100; \$20.00 per 1000.

RHODODENDRONS

We offer the largest collection of imported grafted Rhododendrons on the Pacific Coast. All are choice bushy plants, well set with flower buds which will cover the plant with massive clusters of blooms the first season. Named varieties are available in all colors and shades. All plants have been recently transplanted and may therefore be moved any time with entire safety.

BLOSSOM TIME

Everyone is invited to witness the gorgeous floral display presented by our field of Rhododendrons at blossom time in the latter part of May about Decoration Day.

	Each

SHADE AND ORNAMENTAL TREES

We have a number of large, fine specimen trees for immediate effect. Prices on application.

Ash, Mountain. 3-4 ft., 50c; 4-6 ft., \$1.00; 6-8 ft., \$1.50. Specimen trees from \$2.50 to \$5.00.

Beech, Purple. 6-10 ft., \$3.50 and \$5.00.

Birch, Cut-Leaved. 6-8 ft., \$3.50-\$5.00; 8-10 ft., heavy, \$7.50 to \$10.00.

Birch, White or Yellow. 8-10 ft., \$2.50 to \$5.00. Catalpa Speciosa. 6-8 ft., each \$1.50, \$2.50.

Catalpa Bungei (Chinese). Each, \$5.00 and \$7.50. Chestnut, American. 4-6 ft., \$1.00; 6-8 ft., \$1.50 to \$2.50.

Chestnut, Horse. White flowering, 6-8 ft., \$2.50; 8-10 ft., \$3.50 to \$5.00; extra large trees, 12-20 ft., \$8.00, \$10.00, \$15.00.

Chestnut, Horse. Red flowering; \$3.50 to \$5.00. Elm, American. 6-8 ft., \$1.50; 8-10 ft., \$2.50.

Hawthorn. Double Paul's Scarlet. 6-8 ft., \$2.50; extra large, well branched tops, \$3.50 and \$5.00. Hawthorn. Pink. Same price as red.

Hawthorn. White. Same price as red.

Laburnum (Cytisus). Golden chain; 4-6 ft., \$1.50; 6-8 ft., \$2.50 to \$3.50.

Linden, American and European. 6-8 ft., \$1.50; \$2.50.

Locust, Black. 6-8 ft., \$1.00; 8-10 ft., \$2.50, \$5.00. Locust, Honey. 5-8 ft., \$1.50 and \$2.50. Magnolia. White, 8 to 10 ft. \$3.00 to \$7.50.

Maidenhair Tree (Ginko Biloba). 4-6 ft., \$1.50; 6-8 ft., \$2.50 to \$3.50.

Maple, Ash-Leaved Box Elder. 8-10 ft., \$1.00-\$2.50. Maple, Gold and Silver Variegated Ash-Leaved. (Acer Negunda). Sizes, \$1.50 to \$3.50.

(Acer Negunda). Sizes, \$1.50 to \$5.50.

Maple, Norway (Hard Maple). 6-8 ft., \$1.50; 8-10

ft \$2.50 \$3.50

ft., \$2.50, \$3.50. Maple, Schwedleri. Purple leaved. 6-8 ft., \$2.50

Maple, Schwedleri. Purple leaved. 6-8 ft., \$2.50 to \$3.50; 8-10 ft., \$5.00.

Maple, Silver. 6-8 ft., \$1.00; 8-10 ft., \$1.50 to \$2.50. Maple, Soft. Native, 6-8 ft., \$1.00; \$1.50 to \$2.50; 10-12 ft., \$3.50, \$5.00.

Mulberry, Russian. 4-8 ft., \$1.00 to \$2.50.

Oak, European White. 12-16 ft., \$5.00 to \$10.00. Plane, Oriental. 6-8 ft., \$1.50 to \$2.50.

Poplar, Carolina and Lombardy. 4-6 ft., 50c; 6-8 ft., \$1.00; 8-10 ft., \$1.50 to \$2.50; 10-12 ft., \$3.50;

12-16 ft., \$5.00; 16-20 ft., 10.00 to \$15.00. Poplar, Silver 4-6 ft., 50c; 6-8 ft., \$1.00 to \$2.50.

Prunus Pissardii. 4-6 ft., \$1.50; 6-8 ft., \$2.50; 8-10 ft., \$3.50 to \$5.00.

Sycamore. 6-8 ft., \$1.50; 10-12 ft. \$3.50, \$5.00. Tulip Tree (Liriodendron). 4-6 ft., \$2.50.

Walnut, Black. 6-8 ft., \$2.50; 8-10 ft., \$3.50, \$5.00. Walnut, English. (See Nut Trees on page 7.)

DECIDUOUS WEEPING TREES

Ash. Mountain. (Weeping), 2-3 year old heads. \$2.50, \$5.00.

Birch, Cut-Leaved. (See Shade Trees.) Elm. Camperdown, 5-7 ft., \$3,50 to \$5,00. Mulberry, Teas. 6-8 ft., \$2.50, \$3.50, \$5.00. Willow, Babylonic. 6-8 ft., \$2.50, \$3.50. Willow, Kilmarnoch and New American. 2-4 year old heads, \$3.50; specimen trees, \$5.00.

HARDY DECIDUOUS FLOWERING SHRUBS

All flowering shrubs, unless otherwise noted, each 50c; dozen, \$5.00; extra large, each 75c to \$1.00 and \$1.50. In most of the varieties listed below we have large sizes good for immediate effect.

Almond, Double flowering, Red, white and pink, 2-3 ft., each, \$2.50.

Althea (Rose of Sharon). In colors. Extra large, \$1.00 to \$1.50.

Amorpha Fruticosa (False Indigo). Each \$1.00. Apple, Bechtel's Flowering Crab. Each, \$1.00, \$1.50 and \$2.50.

Azalea pontica (Hardy Ghent Azalea), Each \$3.50. Barberry, Purple leaved. 50c, 75c, \$1.00.

Barberry, Thunbergii (Japanese). pact. Each 35c, 50c, 75c, \$1.00. Com-

Barberry, vulgaris. Common Barberry. 50c to

Calycanthus. Spice bush. 75c, \$1.00.

Cherry, Double Flowering (Japanese). \$2.00; 3-4 ft., \$3.50. 2-3 ft...

Deutzia crenata. Pink and white. 50c to \$1.00. Deutzia Lemoinei. White. 50c, 75c.

Deutzia Pride of Rochester, Pink, 50c to \$1.00.

Deutzia scabra. Double white. 50c to \$1.00. Dogwood (Cornus). White, \$1.00 and \$1.50.

Dogwood. Red bark. \$1.00 and \$1.50. Elder, Golden (Sambucus aurea).

Extra large. 6-8 ft., \$1.50 and \$2.50.

Evonymus alatus. Large shrub. Foliage fine. rose color in autumn.

Evonymus Europaeus. Large shrub, bearing rosecolored capsules with red seeds in autumn.

Forsythia. Very early, bright yellow. Extra large, 4-6 ft., \$1.00.

Fringe, Purple. 75c to \$1.50.

Fringe, White.

Heather. See Broad Leaved Evergreens.

Honeysuckle, Bush. Red tartarian. Each, \$1.00. Hydrangea arborescens. Hardy. Pure white, large flowers.

Hydrangea hortensia japonica. Pink. Each \$1.50, \$2.50, \$3.50 and \$5.00.

Hydrangea otaksa. Pink or blue. Each \$1.50, \$2.50, \$3.50, \$5.00.

Hydrangea paniculata grandiflora. Very large showy flowers. Very hardy. Each, 50c, 75c, \$1.00.

Hydrangea paniculata grandiflora. Standard, (tree shaped). \$1.50 and \$2.50. Kerria japonica. (Globe Flower.) Large yellow

flowers. 50c, 75c, \$1.00.

Lilac. See Lilac list.

Locust, Sweet. Dwarf pink flowering. \$1.00 to

Maple Japanese. Dwarf. Red cut leaf and green, in over 10 varieties. 11/2 ft., to 6 ft., \$3.50 to \$7.50.

Mock Orange (Philadelphus). Single and double flowering.

Olive, Russian. Extra large, each \$2.50 to \$3.50. Quince, Flowering Japanese, In varieties, 75c and \$1.00 each.

Snowball (Viburnum). 75c to \$1.00. Snowball. Standards, \$1.50 to \$3.50 each. Snowball, Japanese. 3-4 ft., \$1.00, \$2.50.

Snowberry. White berries, 50c to \$1.00 each.

Spirea Bumalda. Attains 2 ft. Whitish to deep pink. \$1.00 to \$1.50.

Spirea Bumalda Anthony Waterer. Attains 2 ft. Red. Sizes, 50c, 75c, \$1.00, \$1.50, \$2.50.

Spirea Billardii. Attains 6 ft. Bright pink. Each 50c, \$1.00.

Spirea Budlia (Butterfly Bush). Blue. \$2.50.

Spirea Caryopteris. Blue. Each \$1.00 to \$2.50. Spirea prunifolia. Attains 6 ft. Pure white. 75c, \$1.00.

Spirea Van Houttei. Bridal Wreath. Attains 7 ft. Pure white. Sizes, 75c, \$1.00, \$1.50. Spirea Thunbergii. Pure white. 75c, \$1.00.

Sumac. 4-6 ft., 75c and \$2.50. Tamarix, African. Each 75c, \$1.00, \$2.50.

Weigela, Eva Rathke. Dark red, \$1.00. Weigela. Pink, red and white, \$1.00, \$1.50.

LILACS

DOUBLE FLOWERING VARIETIES

All named varieties, \$2.50. Specimen Plants, \$3.50 to \$5.00 each.

Alphonse Lavallee. Blue, shaded violet. Chas. Joly. Red purple, finest of the darks. Humboldt. Lilac blue. Emille Lemoine. Rosy lilac. Leon Simoj. Blush crimson red. Michael Buchner. Pale lilac Virginite. New color, soft pink.

SINGLE FLOWERING VARIETIES

Single White. Each 25c, 50c, 75c and \$1.00. Single Purple. Each 25c, 50c, 75c and \$1.00. Named varieties as below, each \$1.50, \$2.00 and \$2.50.

Alba. Very large and pure white. Chas. X. Large reddish purple. Louis Van Houtte. Lilac. A good variety. Maria Legrays. Large white; best forcer.

PLANTS IN TUBS

We carry a large and complete stock of evergreen plants in tubs, ready for delivery at all times the year around.

Boxwood in Globe or Pyramid shape in pairs or single plants, each \$2.50, \$3.50, \$5.00, \$6.00,

\$7.50 and \$10.00. Very large Pyramids, \$15.00, \$25.00, \$35.00.

All sorts of Evergreens in green tubs (see "Broad Leaved Evergreens"), from \$1.50 to \$10.00 each. We also supply tubs without plants. Prices on application.

ROSES AND THEIR CULTURE

In our superb climate roses attain a perfection seidom equaled anywhere, but we cannot expect them to thrive unless properly planted and cared for. Therefore, to promote more successful rose growing, the following suggestions are offered:

Roses thrive best in a rich, sandy clay-loam but will do well in any good garden soil if properly fertilized, either with well decomposed cow manure or good commercial fertilizer. Roses are great feeders and should be fertilized every season.

On the Pacific Coast roses can be planted any time after they drop their leaves in the fall until late in the spring. Early planting, however, brings the best results. Upon receiving roses for planting, especially if they appear dry, they should be uncovered at once and heeled-in in a shady place, covering them with soil half way up the stems. Use plenty of water to wash the soil among the plants.

In preparing for planting, dig or trench in good soil mixed with fertilizer to the depth of two feet. Set the plants deep enough to allow the soil to cover above the graft. Firm the soil down solid and water well to wash the soil in among the roots. Trim the bushes, thinning out the branches to three or four of the strongest, which should be cut back at least one-half of the last year's growth. The trimming should be repeated each year in order to produce better flowers and longer stems.

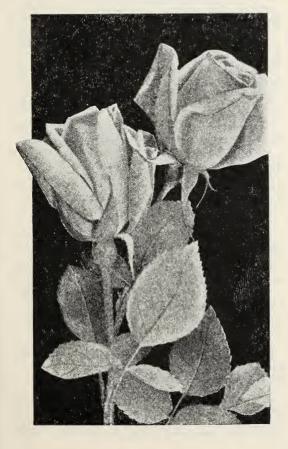

To prevent mildew roses should be watered only in the morning and not in the evening. This is especially important if the nights are cool. Never sprinkle the roses in the heat of the day. Keep the surface well cultivated around the plants, allowing no weeds to rob the rose of its food or sunlight. Fertilizer should be applied two or three times during the season unless the soil is exceptionally rich.

Our Roses are of the choicest, two and three year old stock. We have over two hundred varieties of the most select, new as well as old sorts. We can furnish most of them in large quantities. Write for special prices on lots of one hundred or more. SMALL PLANTS AT LOWER PRICES.

By Mail Postpaid

All Roses, one-half dozen at dozen rate.
Roses at 75c each are 3 for \$2.00.
Roses at \$1.00 each are 3 for \$2.75.
Roses at \$1.50 each are 4 for \$5.00.

CLIMBING ROSES

Climbing Roses are planted generally for individual and immediate effect. We carry a large assortment of well selected big plants at prices quoted below. We can, however, in many instances furnish lighter grades for less money, prices on application. We also carry most of these varieties in extra heavy grade (our XX grade), at \$1.00 to \$1.50 each.

Japanese Iris
JAPANESE IRIS

In the Japanese Iris we have a combination of colors, form and beauty far excelling any other type. The stately flowers are often six to eight inches in diameter and in a beautiful array of colors ranging in shades of white, lavender, blue, red and purple with yellow at base of petals form-

ing a bright yellow throat. They thrive in rich moist soil and may be planted any ti October to March. They should be left the ground for two or three years after time it is better to separate the clumps.	me i	rom e in

FLOWERING BULBS FOR FALL PLANTING

There are no flowers which will give more pleasure and satisfaction than the Winter and Spring Flowering Bulbs. Their culture is so simple and easily understood that anyone can have splendid success with them by exercising a little care and forethought. On the Pacific Coast most bulbs may be planted from October to February. Bulbs planted in October or November will give better results than if planted later. By planting early flowering bulbs, it is possible in our mild climate to have a continuation of flowers the year round.

HYACINTH CULTURE

Outdoor Culture.—The bulbs may be planted any time from October to February. They succeed in any good, well drained garden soil. Dig deep and mix in a little fertilizer. Set the Bulbs so that the tops will be between two and three inches below the surface and six to ten inches apart, with a little sand under and above them if it is convenient, being careful that none of the fertilizer comes in direct contact with the Bulbs. Early planting brings the best results.

Pot Culture in the House.—Plant from September to December in rich, sandy loam, inserting the bulb (base downward) so that the top is just above the surface. Do not pack the soil in the pots, as the Bulbs will be much less liable to push out when the root growth commences if the soil is not packed. Water thoroughly and set the pots away in a cool, dark place for three weeks. This will allow the roots to grow and become firmly fixed in the soil. The plants can then be brought into the light and will at once commence the top growth. Keep near the light, and at a temperature of 50 to 70 degrees. Water frequently.

Water Culture.—Fill the glass with water until the base of the Bulb rests on the water. Set away in the dark for three weeks. Fill up the glass with water as fast as it evaporates. If the water becomes impure it should be changed and the roots well cleaned before putting in again. A small piece of charcoal put in the glass will keep the water pure much longer. Give as much fresh air as possible without a direct draught, plenty of light and keep the glasses full of water. If moved out of the direct rays of the sun, flowers will last longer.

SINGLE HYACINTHS

Single Hyacinths are more desirable than the double. They are better for forcing, more vigorous in growth and are more beautiful than those of the double sorts.

DOUBLE HYACINTHS								

While the flowers of double hyacinths are beautiful they are not as satisfactory as single hyacinths. The term double in connection with hyacinths is often misunderstood. It means double bells, which are smaller than single bells. The spikes of the double flowering sorts are not as large or as perfect as the single.

Selected First Size

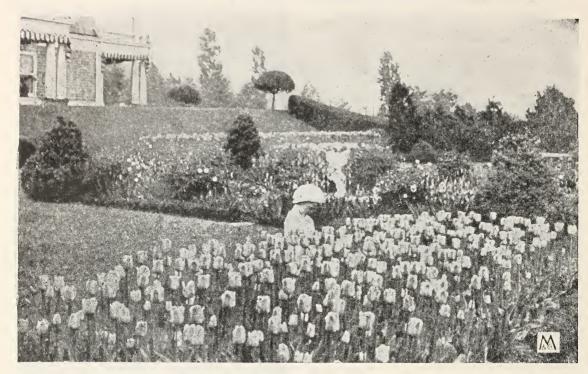

Each, 20c; dozen, \$1.75; 100, \$14.00. Malmo pays the postage. Blocksburg. Pale blue.

Garrick. Bright blue.

La Tour d'Auvergne. Pure white.

Princess Louise. Red.

Sunflower. Pure yellow.

TULIPS

The climate on the Pacific Coast is ideal for the growing of Tulips. They may be left in the ground from year to year, otherwise the directions for culture is the same as for hyacinths, except that tulips cannot be grown in water.

EARLY SINGLE TULIPS

The following list is made up entirely of the best varieties, all of which are suitable for either forcing or bedding. We import only the highest grade first size bulbs which always give the best results. Malmo pays the postage.

GIANT DARWIN TULIPS

MAY FLOWERING

Darwins are the most popular Tulips for outside planting. They flower in May, are of giant size and have a majestic beauty distinctively their own that is invaluable for garden and landscape effects. They come in the most varied and brilliant colorings, and their immense flowers of perfect form and satiny, wax-like texture, long stems and lasting qualities, make them ideal for both bedding and cutting.

Customers at a distance will find it convenient to order by mail. Malmo pays the postage. Ask for prices on quantity.

BYBLOEM AND BIZARRE TULIPS

These flower at the same time and are somewhat similar to the Breeder and Darwin Tulips, but do not grow so tall and are quaintly and very attractively striped and feathered in contrasting colors. They appear especially to advantage planted in clumps among shrubs or in a border. Bybloem and Bizarre. All colors mixed___

REMBRANDT TULIPS (May Flowering)

The Tulips of this class are very much like the Darwins but are variegated and oddly striped and feathered, and of splendid decorative value. 100, \$6.00 Rembrandt Tulips. All colors mixed ___ _____Doz. 75c

MAY FLOWERING OR COTTAGE TULIPS

The May Flowering Tulips, like the Darwins, flower late. Many of the varieties are used extensively for late bedding and are magnificent for this purpose. The vale primrose, deep yellow, and splendid white varieties are often planted with the Darwins for effects of contrast. The following list contains the best varieties. Malmo pays the postage.

NARCISSUS OR DAFFODILS

POETICUS AND POETAZ NARCISSUS

The Poeticus Narcissus are probably the best known of the short trumpet or cup class. They have only one flower on a stem but are very hardy and multiply rapidly in the ground. They also force well. The blossoms of the Poetaz class are somewhat similar to the Poeticus and borne in clusters of three to eight flowers on a stem.

Customers at a distance will find it convenient to order by mail.

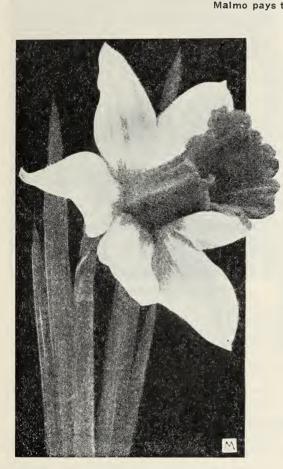

Malmo pays the postage.

NARCISSUS-GIANT TRUMPET VARIETIES

The flowers of the Giant Trumpet varieties are of large size; the "perianth" or wing-like petals, according to the variety, measure from 2 to 4 inches across, and the "trumpets" or central funnel-like tubes vary from 2 to 4 inches in length. Flowers are borne on strong, stiff stems, which vary in height from 12 to 18 inches.

POLYANTHUS NARCISSUS

The Polyanthus Narcissi are very fragrant, borne in large heavy clusters (not suitable for growing outdoors). They are extra early and may be forced indoors either under glass for cut flowers or in pots for blooming as early as the Christmas holidays. After planting they should be kept in a dark place from two to four weeks to make roots, then gradually brought to the light for blooming at whatever time desired. They may also be grown in bowls filled with gravel and water.

CROCUS

This is the earliest bulb to blossom in spring. Although most showy when massed in large beds, or when planted in lines of distinct colors, a very desirable effect is produced by setting Crocus here and there over the lawn.

Crocus will care for themselves, blooming very early amid the grass and dying down to the bulb in ample time to be entirely out of the way of the lawn mower. The Crocus should be planted in the autumn, in any good garden soil, about three inches deep and about two inches apart, if in beds or borders.

LILIES

Lilies planted outdoors during the fall or early spring, flower each year from June to October. After bulbs are set out they should remain undisturbed for five or six years. They will increase in size, beauty and number of flowers; our Coast climate being perfectly suited to their requirements. They may be planted in open ground or in beds and are very effective when planted in a border either alone or among perennials or shrubbery.

LILY OF THE VALLEY

One of the most charming spring flowering plants, producing in profusion its delicate bell-shaped, delightfully fragrant white flowers. They thrive best in a rich sandy soil and a shady situation—are perfectly hardy and can be left undisturbed in the open ground, where they will increase from year to year, and are very attractive in beds or borders. For outdoor planting and winter forcing pips are ready December to March.

FRITILLARIA (Crown Lily)

This beautiful miniature lily of many colors thrives almost anywhere in the temperate zone. The sturdy plants support groups of drooping flowers through March, April and May. Bulbs should be planted during the fall or very early in the spring.

Mixed colors__Each 15c; Dozen, \$1.50; 100, \$10.00

GALANTHUS (Snowdrop)

The daintiest little flower of early spring. Produces its graceful p ndants of pure white and delicate green during March when flowers are scarce. Prefers a cool shady location and should be planted, two or three inches deep, in the fall or very early spring.

Single _____each 5c; dozen 35c; 100 \$2.50 Double ____each 5c; dozen 50c; 100 3.00

GRAPE HYACINTHS

(Muscari Botry)

Beautiful small hyacinth like flowers drooping somewhat like a bunch of grapes. Flowering in March nd April if planted in the fall or winter. Used in borders, mixed beds or among rocks.

Betroides Blue ______dozen 35c; 100 \$2.50
Betroides White _____dozen 50c; 100 3.50

SPARAXIS

Dwarf growing bright colors, funnel shaped flower. Fine for potting or bedding.

Mixed colors _____dozen \$0.75; 100 \$5.50

WINTER ACONITE (Eranthis Hyemalis)

Hardy winter flowering plants with beautiful foliage and ranunculus-like flowers—blooming during February and March.

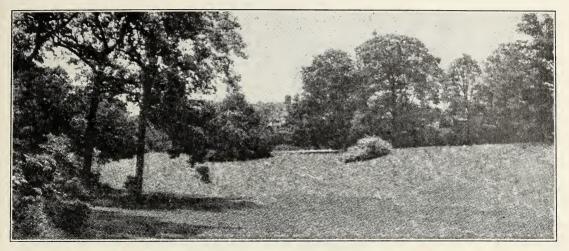

Mixed _____dozen 35c; 100 \$2.50

SERVICE

If you are building a new home and want to beautify the grounds, we have a staff of experienced nurserymen at your service to give you information regarding desirable plants and trees, and cost estimates.

If you are contemplating planting an orchard or only a few trees for your own use, we offer you the advantage of our experience of over thirty-one years, enabling us to advise you as to varieties and care of stock most suited to your requirements.

We issue a complete Spring Catalog—Planting Guide, including Vegetable and Flower Seeds—Free on Application.

HOW TO MAKE A HANDSOME VELVETY LAWN

The best time to make a lawn, we consider, is either in late summer or spring.

Spade the soil deep and cultivate well. If the soil is sour use hydrated lime, about 100 lbs. to 1000 sq. ft., applying it preferably two to four weeks before seeding. Commercial fertilizer should be scattered on evenly and well raked in just before the seed is sown. In sowing the seed be careful to spread it evenly. The best method is to take half of the seed and sow it walking across the lawn, then take the other half and sow it walking lengthways. After the seed is on do not rake, but roll it in. If a roller is not available, tamp the seed into the ground with the back of the shovel. Sprinkle lightly, being careful not to float the seed.

While the seed is germinating and the grass is young extra care should be used, especially during dry weather, that the ground be kept moist. It should never be allowed to dry out but cannot be soaked, so it is necessary to watch it very closely and sprinkle whenever necessary, sometimes as

often as three times a day.

Commence cutting as soon as the grass is long enough, and cut often. This will both thicken the grass and make it finer. If cut often the clippings may be left on the ground for fertilizer. They will not be noticeable unless the grass is allowed to grow too long between cuttings.

After the lawn is established it should be thoroughly soaked about once a week during the dry weather. When watering, saturate the ground thoroughly and it will not be necessary to do it so often.

WASHELLI LAWN GRASS

This is the grass that is used exclusively at Washelli Cemetery and has produced all of their beautiful lawns. It is the best mixture of grasses for the purpose of quickly producing a fine, lasting lawn. Each variety of grass is there for a special purpose and nothing but the very highest grade of clean seed is used. It makes a rich, velvety, dark green turf that, when properly cared for, improves with age and stands almost any amount of wear. It starts quickly and makes a good lawn the first season. Sow 1 lb. to every 200 square feet. Subject to market change.

WASHELLI LAWN GRASS (Ask for price on large quantity. Postage extra) ___ 1 lb. 65c; 10 lbs. \$6.40; 100 lbs. \$63.00.

EVERGREEN LAWN GRASS

A special blend of deep rooted, fast growing, turf forming grasses, somewhat coarser than Washelli. It starts quickly and grows well, even on poor soil and for those who want a quick permanent lawn at a minimum price this is the best. Sow 1 lb. to every 200 square feet.

EVERGREEN LAWN GRASS (Subject to market change. Postage extra)___1 lb. 35c; 10 lbs. \$3.45; 100 lbs. \$34.00. SHADY LAWN GRASS

It is usually quite hard to obtain a good lawn under trees or in other shady places. This grass, however, will grow well and make a thick green turf in places where ordinary grass will not thrive for want of light. Sow 1 lb. to every 150 square feet. Ground that is densely shaded is very apt to be "sour" and as a rule the best results are obtained when an application of Hydrated Lime of about 100 lbs. to 1000 square feet is made before seeding.

SHADY LAWN GRASS (Subject to market change. Postage extra)_____1 lb. \$1.00; 10 lbs. \$9.50; 100 lbs. \$94.00.

COMMERCIAL FERTILIZER How to Use It

The use of fertilizer is necessary to restock the soil with the plant food taken away with the harvesting of every crop of vegetables, grass, fru it, grain, or flowers. Fertilizer is to plant life what food is to animal life. Most of the soil in this section is deficient in the ingredients necessary to plant growth and maintenance. and the use of fertilizer is of prime importance.

Fertilizer is an investment, not an expense, for when it is used it brings definite returns in dollars and cents in increased crops. It requires no more labor in this respect to grow a good crop than a poor one, and if you can increase the size and quality of your plants 25 per cent, which is a small estimate, the cost of a sack of fertilizer on the back yard garden is completely lost sight of in the increased value of the crop. This applies to grass, flowers, fruit, or anything that grows.

The cost of fertilizer must be determined by the percentage of plant food that it contains and the manner in which it releases it, not by the cost per 100 pounds. Some fertilizers such as HIGH

GRADE FISH FERTILIZER release the plant food very quickly or as we say are quick acting; others, such as bone meal, are very slow, sometimes taking several months before showing any effect. Naturally the quick acting fertilizer of high percentage is the most valuable and even at a greater price is the best investment. In some cases it is advisable to use the slow fertilizer, but as most of the planting and fertilizing is done in the spring, quick action is what is wanted.

Fertilizer may be applied broadcast or just in the rows or hills. For vegetables or flower gardens it is usually applied in the rows at the time of planting the seed. Care should be used, however, to thoroughly mix the fertilizer with the soil. If left in bunches it will burn any seed or root that comes in contact with it.

In using it as a top dressing after the plants are up, it should be spread evenly on both sides of the rows as far out as the roots extend and cultivated in, care being used that it does not come in contact with the stems of the plants.

MALMO'S MULTI-CROP GARDEN FERTILIZER

Analysis: 2% to 3% Nitrogen as Ammonia, 10% to 15% Phosphoric Acid, 3% to 4% Potash.

The most complete fertilizer for vegetables, fruit, flowers and berries, prepared for the gardener who cannot give the time and labor necessary to treat each individual kind of plants separately. MALMO'S MULTI-CROP FERTILIZER is made principally of pure, ground bone meal, dried and pulverized sheep manure, to which is added phosphate, potash and nitrogen, thus containing the necessary ingredients to supply the average percentage of available plant food required by the greatest number of crops at the least expense. It yields this plant food only as the plants require it and is therefore effective and lasting.

5 lbs., 25c; 10 lbs., 45c; 20 lbs., 85c; 50 lbs., \$1.75; 100 lbs., \$3.25. Ask for quantity prices.

HIGH GRADE FISH FERTILIZER

Analysis: 8% to 10% Nitrogen as Ammonia; 10% to 15% Phosphoric Acid.

A high quality ground and dried fish fertilizer, the best for quick results in the growing of roses, or the making and renewing of lawns or other uses where production of luxuriant foliage is desired. Its wonderful rapid action is due to the availability of its high nitrogen content, which is yielded to plant life as fast as it can be assimilated without the danger of over-stimulation or burning attending the use of nitrate of soda. For use on Flowers and Vegetables: Spread evenly over the ground as far out as the roots extend. Cultivate well; keep from stems of tender plants. For LAWNS, apply broadcast and rake in well, 100 lbs. for 1,500 sq. ft.; on old lawns use 100 lbs. to 3,000 sq. ft. Pulverize all lumps, wet with coarse spray.

5 lbs., 35c; 10 lbs., 60c; 20 lbs., \$1.10; 50 lbs., \$2.50; 100 lbs., \$4.75. Ask for quantity price.

FERTILIZERS—Continued

Prices are f. o. b. Seattle docks, railroads, or our warehouse, and subject to market changes without notice. Extra charge for city delivery. (Ask for prices in quantity)

SEA-PRO-CO GRASS FOOD

Fish Fertilizer. Good for lawns, roses, etc. Analysis: 7% to 10% Nitrogen as Ammonia, 2% to 3% Phosphoric Acid.

100 lbs., \$4.50; 50 lbs., \$2.40; 20 lbs., \$1.00; 10 lbs., 60c: 5 lbs., 35c.

SEA-PRO-CO

PLANT FOOD FISH FERTILIZER

Analysis: Nitrogen as Ammonia 5% to 7%. Bone Phosphate, 5% to 8%. 100 lbs., \$3.75; 50 lbs., \$1.90; 500 lbs., \$17.50; 1000 lbs., \$34.00; per ton, \$65.00.

SUPER-PHOSPHATE

17% to 22% Phosphoric Acid.

Super-Phosphate furnishes a quickly available supply of phosphoric acid and is especially desirable as a top dressing for grain and fruit.

300 to 500 lbs. per acre. 10 lbs., 35c; 20 lbs., 60c; 50 lbs., \$1.25; 100 lbs., \$2.25. Ask for quantity price.

PURE ANIMAL BONE MEAL

2½% to 3% Nitrogen as Ammonia, 22% to 45% Phosphoric Acid. Analysis:

Valuable as a fertilizer where a large amount of phosphoric acid is required, combining also the advantage of a nitrogen content. It releases plant food continually through slow decomposition, making it desirable for use in rose beds and other permanent plantings.

5 lbs., 30c; 10 lbs., 50c; 20 lbs., 90c; 50 lbs., \$1.95; 100 lbs., \$3.75. (Ask for quantity prices.)

BLOOD AND BONE

4% to 6% Nitrogen as Ammonia, 7% Analysis: to 9% Phosphoric Acid.

Blood and Bone is composed of waste animal matter, yielding its plant food quickly when spread over the soil. It is, therefore, valuable for quick growing foliage crops, 500 to 1,000 lbs. per

5 lbs., 30c; 10 lbs., 50c; 20 lbs., 90c; 50 lbs., \$1.80; 100 lbs., \$3.50. Ask for quantity price.

SHEEP MANURE

11/2% to 2% Nitrogen as Ammonia, Analysis: 1% Phosphoric Acid, 2% to 21/2% Potash.

The sheep manure we offer and recommend is kiln dried and finely ground, practically free from germinable seeds and moisture.

20 lbs., 50c; 50 lbs., 00c; 100 lbs., \$1.75; 500 lbs., \$8.00; 1000 lbs., \$15.00; per ton, \$28.00.

Sheep Manure, Common. Dried and screened. 100 lbs., \$1.50. Ask for quantity price.

MURIATE OF POTASH

Analysis: Potash 52%.

This is a very strong, quick acting fertilizer and is the best form of Potash available for ground that is lacking in this element. It is packed 200 lbs, in a bag and is generally used at the rate of about 1 bag to the acre.

5 lbs., 35c; 10 lbs., 65c; 20 lbs., \$1.20; 50 lbs., \$2.50; 100 lbs., \$4.75; 1 sack (200 lbs.), \$9.00.

NITRATE OF SODA

13% Nitrogen.

Nitrate of Soda is entirely soluble, like salt and should be used frequently in light dressings for best results; 150 to 200 lbs. per acre.

5 lbs., 35c; 10 lbs., 65c; 20 lbs., \$1.25; 50 lbs., \$2.30; 100 lbs., \$4.50; 200 lbs., or more, \$4.00 per 100 lbs.

GYMPSUM OR LAND PLASTER

For sweetening the soil, freeing plant food and supplying sulphur.

50 lbs., 85c; 100 lbs., \$1.50. Ask for quantity price.

HYDRATED LIME

This lime, which is the best adapted for general use, including lawns, neutralizes the acid of the soil making it possible for fertilizer to accomplish maximum results. This form is quick and efficient. An application will attain the same results as twice the quantity of Ground Lime Rock. 20 lbs., 50c; 50 lbs., 85c; 100 lbs., \$1.50.

GROUND LIME ROCK

Used for sweetening the soil, but on account of slower action must be used in larger quantities than Hydrated Lime. One ton or more per acre required, according to extent of acidity of the soil. Indispensable to success in growing Alfalfa on the west side of the Cascade Mountains. 100 lb. sack, \$1.00. Ask for quantity price.

"TORO" AGRICULTURAL SULPHUR

No plant can grow to maturity without the element of sulphur. "Toro" Brand is especially prepared to make these elements available for the plants and to act upon other chemicals naturally in the soil, transforming them into plant food. Applications of from 100 to 500 lbs. of "Toro" Sulphur per acre have, in many cases, doubled the yield.

2 lbs., 25c; 5 lbs., 40c; 10 lbs., 75c; 20 lbs., \$1.35; 50 lbs., \$3.25; 100 lbs., \$6.00.

TOBACCO FUMIGATOR

(For other Insect and Fungus Eradicators see "Spray Material," pages 45-46.)

HALL'S NICOTINE FUMIGATOR

Effective and economical for fumigating greenhouses. A specially prepared tobacco powder, treated to insure proper burning qualities, saturated with pure nicotine-121/2 % guaranteed. Packed in airtight tins.

Easy to Use

A measure is enclosed in each tin. Fill measure, press in gently and empty the cone of fumigator on a tin plate.

Light cone at top. It will light easily, burn evenly, and will be consumed in five minutes. The cone should be placed at least 12 inches above the floor. One cone will fill 7000 cubic feet. 1 lb. cans, \$1.25; 21/2 lbs., \$2.50; 10 lbs., \$8.50.

Takes half the labor out of hoeing. One man can accomplish more than two with the old-fashioned hoe. With an extra handle two persons can be equipped with one outfit.

Description—The Bouquet Holder consists of two parts. The outer shell is sunk with its top level with the ground. Its bottom end is only partly closed so that rain water will soak away. The inner vessel holds the water and flowers. It has handle to lift out for filling and holds about a quart and a half of water. A sliding collar is mounted on this vessel, this collar holds the vessel up when in use. When the bouquet holder is not in use it is reversed, the sliding collar allows it to drop and hang by the rim on the bottom, and the entire outfit is then level with top of ground.

Each \$1.00. Postage extra. Shipping wt. 3 lb.

SPRAY MATERIAL

If you do not know what to spray with, write us giving all the information that you can and we will be glad to advise you what to use. Prices subject to market change. Postage extra.

Arsenate of Lead. For spraying trees and shrubs or plants against the attacks of leaf-biting or leaf-eating insects. Can be combined with other sprays. Use 1 to 2 lbs. to 50 gallons of water; 1 to 2 tablespoonfuls to a gallon. Poison, not mailable. ½ lb., 35c; 1 lb., 65c; 5 lbs., \$2.50; 25 lbs., \$12.00; 50 lbs., \$19.00.

"Black Leaf 40." Poison, cannot be mailed. A concentrated solution of nicotine sulphate containing 40 per cent nicotine. Fish oil soap mixed in this solution makes it more effective and is necessary for perfect results. 1-oz. bottle, 35c, makes 5 gals. spray; ½-lb. can, \$1.25, makes 47 gals. of spray; 2-lb. can, \$3.50, makes 240 gals. spray; 10-lb. can, \$13.50, makes 1000 gals. spray. Full instructions with each can.

Bluestone. 1 lb., 15c; 10 lbs., \$1.40.

Bordeaux Mixture, Dry Powdered. Quickly dissolved in water. Used for fungus diseases such as mildew, potato scab, tomato blight, etc. Can be used in combination with Arsenate of Lead or Paris Green. 8 lbs. to 50 gals. of water. 1-lb.

can, 45c; 5-lb. can, \$1.75; 25-lb. drum, \$6.00. Poison, cannot be mailed.

Carco Vegetable Spray for root maggots, cutworms, scale, mildew, etc. 1/2 pt., 35c; 1 pt., 60c; 1 qt., \$1.00.

Crest Spray. A vegetable oil spray for scale, aphis and root maggots. Will not injure foliage or tender plants. May be used either as a dormant or summer spray. 1 gallon makes from 50 to 100 gallons when diluted. 1 pint, 35c; 1 quart, 60c; 1/2 gal., \$1.00; gal., \$1.75; 5 gals., \$7.50.

Paris Green. 8 lbs. to 50 gals. of water. _1-lb. can, 75c; 5-lb. can, \$3.50. Poison, cannot be mailed.

SPRAY MATERIAL—Continued

Fish Oil Soap. 1 lb., 15c; 10 lbs., \$1.25. Formaldehyde. Poison, cannot be mailed. Kills scab and prevents blight on potatoes. 1 pint makes 30 gallons. Soak seed potatoes in solution for two hours. ½ pint, 50c; 1 pint, 90c.

Hellebore. For currant worms and chewing in-

sects. 1/2 lb., 40c; 1 lb., 75c.

Dry Lime Sulphur. Lime and sulphur solution in a dry powdered form. Instantay soluble. Does everything that lime sulphur solution will do. Is easier to handle and will keep indefinitely if container is closed tight. It weighs about one-sixth as much as the liquid, so will save in transportation and handling charges, 1 lb, makes 5 gallons, 1 lb., 30c; 5 lbs., \$1.25; 10 lbs., \$2.00; 25 lbs., \$4.50.

Mag-O-Tite. For the prevention of root maggots. 2 lbs., 35c; 4 lbs., 60c; 8 lbs., \$1.00.

Nico-Fume Liquid. For spraying or vaporizing. 1/4-lb. tin, 75c; 1-lb. tin, \$2.25; 4-lb. tin, \$8.00; 8 lbs. (gal.), \$15.00. (Cannot mail.)

Nicotine Fumigator, Halls. (See page 41.)

Slug Shot. 1 lb., 15c; 5 lbs., 65c. Sulphur. Powdered. Lb., 5c; 100 lbs., \$3.00. Rose Spray. Kills mildew and aphis on rose bushes and other plants. Pt., 45c; qt., 80c.

SPRAY PUMPS

HAND SPRAYERS

Made of heavy tin, suitable for spraying small plants and rose bushes. Capacity about 1 quart: 50c each.

CONTINUOUS HAND SPRAYER

Made of heavy galvanized iron, and if properly cleaned after using, will last many times longer than the ordinary tin sprayer. Throws a continuous spray and has an extra nozzle for spraying at an angle. \$1.25 each.

ALL BRASS CONTINUOUS

Throws a steady spray. All parts removable for cleaning, and being made entirely of brass, will outlast any other hand sprayer. \$1.50 each.

STANDARD SPRAY PUMPS

Double acting, all brass, continuous. Pump is held in both hands and suction hose is dropped into a bucket. \$5.50 each.

HANDY POWDER DUSTER

Easy to operate. The reservoir is filled with dry powder. Size of spray depends upon operation of plunger. Funnel and elbow are reversible, enabling operator to spray up or down. 80c.

WHEELBARROW SPRAYERS

No. 40. 18-gallon tank made of heavy galvanized steel, reinforced with iron bands; a standard pump with an air chamber fastened to the tank by a spider casting. Frame made of steel tubing well braced. Tank easily removed. Single wheel 18 inches, with 2½ inch face. Ten feet of ½-inch, 5-ply hose, 4 foot spray rod and shut-off nozzle. \$28.00.

No. 40-A. Same as above, but has an air pressure tank mounted on the spider. Sufficient pressure may be attained and considerable spraying done with one pumping. Has pressure gauge and drain plug. \$40.00.

No. 85-A. Same as No. 40-A. except that it has two wheels and the handles are connected at the rear. This makes it narrower (18 in.), which permits its use in greenhouses, where the aisles are narrow, and allows it to be moved with one hand. \$47.00.

NOS. 10 AND 15 COMPRESSED AIR SPRAVERS

The No. 10 tank is made of galvanized steel, the No. 15 of brass; holds 31/2 gallons. Seam closely riveted and all joints well soldered and tested.

Pump, brass, with bronze ball valve. One-half inch 5-ply hose attached to tank with standard brass hose connection. Filling cap easily removed without a wrench. Angle nozautomatic shut - off zle. type, brass, with strainer, fine, medium and course discs.

No. 10 Galv. tank____\$7.00 No. 15 Brass tank ____ 9.00

ALL BRASS BUCKET PUMP

All parts except handle and foot rest made of brass. Gives a strong, steady pressure on the nozzle with little exertion. Comes with 2 feet of hose and adjustable nozzle. Will handle whitewash as well as spray materials. \$5.00 each.

NO. 185 COMPRESSED AIR SPRAYER

A small compressed air sprayer, holds about 1 gallon. Constructed same as No. 10, except that the discharge is through a pipe. The nozzle is brass and has a strainer. \$4.00 each.

SPECIAL OFFER!

Sweet Pea Collection

TEN CENT

We will mail postpaid our selection of fifteen ten cent packets of GIANT SPENCER SWEET PEAS, including such varieties as King Edward, King White, Primrose, Asta Ohn, Othello, Mrs. Routzahn, at above price, a saving of one-third.

EARLY FLOWERING VARIETIES

PACKAGES 50c

Will flower a month to six weeks earlier than regular varieties.

The Best Spencer Mixture Ever Offered-See Below

SPENCER SWEET PEAS GIANT WAVED ORCHID FLOWERING

This group includes the largest and most beautifully formed Sweet Peas. The Spencers have very large waved flowers which are produced abundantly on long strong stems, making the blossoms most desirable for cutting. They attain their greatest perfection on the Pacific Coast where they are grown extensively for seed, furnishing the greater part of the supply for the entire country.

CULTURE. Sweet Peas require good soil and plenty of water. On Puget Sound they may be planted in October, for early Spring flowering. Most seasons they come through without any protection, but a few inches of straw placed on the row will insure sufficient protection against the frosts

usually experienced here. Plant in the Spring as early as the ground can be worked.

The best method of planting is to dig a trench 12 to 18 inches deep. If the soil is not good, remove the poor soil and supply a good quality, using plenty of fertilizer, which should be well mixed with the soil, filling up the trench to within three or four inches of the top. On top of this mixture of soil and fertilizer, place about one inch of good mellow soil without any manure or fertilizer in it, on which to sow the seed. Cover the seed one-half to one inch with soil, a half inch being preferable. If manure is used the soil should be tramped down so not to allow any air space around the seed. When commercial fertilizer is used the soil is usually packed enough for this purpose. During the Summer the cuttings from the lawn may be used for mulching. But the trench should always be kept open an inch or two from the top in order that water used will lead to the plants. Sweet Peas require more moisture than most other plants, and whenever it is necessary to water them, soak them thoroughly. When the seeds are well up, thin them out and when grown to one or two inches, fill in some more soil around them.

When the Peas are in bloom they should, unless grown for seed, be cut every day. If this is done they will produce better blooms on longer stems and blossom profusely all through the season. One ounce will plant 15 to 20 feet of row.

Malmo's Mixed Spencer Sweet Peas

This is made up from standard varieties named Spencers, properly blended, and is an ideal combination for those who want a variety of color.

Pkt., 10c; oz., 25c; ½ lb., 75c; 1 lb., \$2.50 (Postpaid)

Plant Sweet Peas in the Fall for Early Spring Flowering EARLY FLOWERING SPENCER SWEET PEAS (Postpaid)

A new race of Sweet Peas, having the large waved flowers of the Spencer type, but flowering fully one month earlier, they also continue to flower for a much longer period.

PANSY PLANTS

From Malmo's Special Seeds-The best that can be obtained.

SMALL PLANTS furnished only from Oct. 15th to March 1st. Will bloom in early Spring. By mail, doz., 35c; 100, \$2.50.

LARGE PLANTS IN BUD but not in bloom. After April 1st, doz., 60c; 100, \$4.50; postpaid. LARGE PLANTS IN BLOOM. After April 1st, doz., 75_; 100, \$5.00.

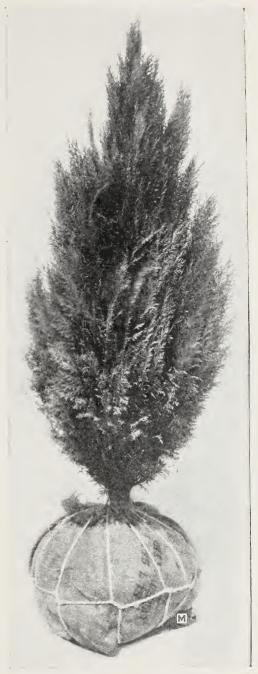

We Carry a Complete Assortment of Bedding Plants in Season

Success In Transplanting

trees and shrubs has its foundation in the care given them in the nursery. Our stock is transplanted often to insure a fibrous root system close to the plant.

All evergreens are carefully dug with a solid ball of soil which is wrapped with burlap and properly tied to prevent breaking. The rich soil in our nurseries is especially adapted to this method of handling, thus allowing the transplanting of our evergreens at any time with the utmost of safety.
